Looking Back on 2021

Learn about our recent advancements and how we are staying ahead of growing solution trends.

SWITCHWARE Support for Visa Tokenization Services

CSFi has partnered with Visa to develop and deploy a fully integrated VTS interface, which installs directly on SWITCHWARE.
Read more here...

SWITCHWARE Dynamic Currency Conversion Services with FEXCO

CSFi can perform the currency conversion with FEXCO before sending the authorization request to the issuing institution.
Read more here...

SWITCHWARE App Containers

When users installing CSFi solutions use APP containers, they are freed from the burden of worrying if they have all the necessary dependencies, because everything is packaged up in the APP container.
