Issue 14: Winter 2018

A quarterly newsletter offering insights into electronic payments, trends and software solutions.

Highlights for this issue include:

[Riding the Wave](#) | [Success Stories](#) | [Product Updates](#) | [Did You Know](#) | [EMV Resources](#)

Riding the Wave

Skipping the dip

Over 50% faster than dip and wait, "Tap and Go" technology is a global hit. The European, Canadian, Australian and Asian experience with contactless technology has been spectacularly successful. Resolving EMV "dip and wait" payment trauma, speedy and secure contactless payments are transforming the global payments landscape.

Better late than never

United States financial institutions and card issuers are following the lead of other nations to quickly implement the use of Near-field communication (NFC) payment technology. Already accommodating contactless authorization abroad, CSFi and SWITCHWARE® already support the implementation of NFC technology.

SWITCHWARE® G4 is uniquely positioned to accommodate future innovation and to meet the unique needs of our customers in an ever-evolving world of digital payments.

[Contact CSFi](#) today and learn more about how [SWITCHWARE®](#) can help achieve your strategic goals.

Success Story

SWITCHWARE® G4 Now Supports NCR S2 High Capacity Note Dispenser

SWITCHWARE® is now certified to support NCR's new [S2 Media Dispense Module](#). As a component of NCR's [Media Handling 2.0](#) bundle that provides functionality for high capacity withdrawals, deposit and recycling modules, the S2 dispenser technology drives higher availability and dependability through a series of hardware and software improvements to the NCR ATM.

Product Updates

New SWITCHWARE® Card Limit Rules: Reducing Risk and Minimizing Chargebacks

SWITCHWARE'S new AdjustNewCardLimit rules allow customers to reduce risk and minimize chargebacks while processing card based payments and ATM withdrawals.

Preloaded with an expandable list of 23 pre-defined rules, the new cardholder limits accommodate card present, card not present, and NFC PINless transactions at ATM or POS terminals. The updated rule set facilitates "down to card level" management of card limits for any account, from any terminal, acquired from any network.

New card limit rules include:

- Transaction number or amount limits for ecommerce (by internet or phone) for a single transactions or given cycle period
- NFC card limits for ATM or POS terminals by amount or number of transactions for a given cycle period
- ATM single or accumulated amount limits through local, regional or international switches
- Individual or combined account limits for ATM, Card not present and POS based transactions.

CSFi Completes Certification for Diebold's Vista Stateless ATM Program

CSFi is now certified to support interfacing with Diebold's Vista ATM software. This major achievement means customers wishing to implement the Vista multivendor driving solution on their Diebold ATMs may do so by licensing the new Diebold Vista ATM handler for SWITCHWARE®.

Rapidly emerging as the solution of choice for banks large and small, multivendor ATM driving solutions offer significant advantages and flexibility to providers of advanced self-service banking solutions.
